

K-Belt Jack

Conducting maintenance work on a tensioned conveyor belt is often difficult, dangerous and time consuming.

With the aid of Kinder's **K-Belt Jack**, gaining access under the belt can now be done easily, safely and seamlessly.

K-Belt Jack is compact, transportable and features a lightweight design.

Key Features:

- **250kg working load limit.**
- Exceptionally user friendly and portable requiring single person operation.
- Various clamping options available with angle brackets or flat plate available to suit specific conveyor structure designs.
- Swivel arm adjusts to the troughing angle of the conveyor belt.

K-Belt Jack comes fully equipped with custom made high-grade carry bag.
